MYSORE P W DEPARTMENT,
CENTRAL OFFICE,
BANGALORE, 29th October 1907

From W McC Hutchison Esq M.I.C.E
THE CHIEF ENGINEER OF MYSORE,
BANGALORE

To The Secretary to the Govt of Mysore
General & Revenue Depts

SIR,

2 With reference to Government Proceedings No. 329-31/Mrb (32-06)-10 dt/ 12th July 1907, I have the honor to forward for the information of Govt, the enclosed Copy of the Proceedings of a Committee that assembled on the 21st instant at the Staff Quarters at Mysore, to discuss the question of the improvements required to be carried out to the Water Supply system in the Mysore City

I have the honor to be,
Sir
Your most obdt servt

W McC Hutchison
Chief Engineer & Secy.

MYSORE P. W. DEP

No. 3710

From

THE CHIEF ENGINEER OF MYSORE,

To

Dated Bangalore,

Despatched

Enclosure No.

SUBJECT.

A committee consisting of the following members assembled at the Staff Quarters, Mysore, at 8 A.M. on Monday the 21st October 1967, for discussing the question of improvements necessary for the Water Supply in the City of Mysore.

P R E S E N T

1. W. Mc Hutchin Esquire, M.I.C E.,
   Chief Engineer & Secretary to Government, P W D
2. Major H E.Drake-Brockman, I M.S.,
   Sanitary Commissioner with Government
3. Captain N.B.E.Dawes, R F ,
   Deputy Chief Engineer and Under Secretary to Government, P W D.
4. Doctor P Palpu, L M S ,
   Deputy Sanitary Commissioner to Government
5. V. Rangaswami Iyengar Esquire,
   Executive Engineer, Water Supply & Stores Dn
6. B Krishna Rao Esquire,
   Health Officer, Mysore

The following points were agreed upon -

I. That there has been an intermittent supply very often, there is no way of stopping this, unless we give up all idea of supplying the maximum requirements of the town, without giving up all idea of supplying water in the Devaro Channel for irrigation beyond the 11th mile stone, until the electrical plant is erected

That there is great danger in such intermittent supply, as having occurred, even for a few hours, it takes perhaps 24 hours or more to get things back into normal condition again on occasions

II. That an estimate should be prepared for lining the deadends throughout the town, which should be submitted with plan and proposed pipe lines in yellow

ne following resolutions were also passed -

I. That a Committee of the marginally noted officers consisting

. Kantaraj Urs,
Deputy Commissioner
3 Krishna Rao,
Health Officer
V Rangaswami Iyengar,
Executive Engineer
K Maconochie, I.C.S.,
Private Secretary to
His Highness the
Maharaja of Mysore

be appointed with full authority to decide on the position of Stand posts and the removal of surplus and unnecessary ones

"IV. That this Committee also consider the necessity of covering in the Flushing tanks constructed by the Improvement Trust, and to construct all new ones on a modified plan, which has been approved of by the Sanitary Officers and the Engineering Department

V That all flushing tanks to latrines be fitted with ball valve automatic flushing, and this has been agreed to by the Trust Board

VI That an examination of pipe mains throughout the system be at once proceeded with

NOTE:- (1) It is proposed to increase the depth of sand in filters to a minimum of 2, 6", instead of 2' as now, if, after testing, it is found that the supply to the town is not interfered with The grading and testing of the sand used should also be undertaken

(2) The stand posts should all be numbered

(3) Copies of bacteriological and chemical analysis should be sent to the Executive Engineer, Water Supply and Stores Division, and to the Chief Engineer's office direct

(4) The testing of the filters, reservoirs and pipes for leaks should be undertaken conjointly by Doctor Palpu and Health Department and Engineering Department
